

Precipitated calcium carbonate

Precipitated calcium carbonate enquiries matched to the required particle profile.

Illustrative product image. Grade and appearance are confirmed with the offered material.

Applications to discuss

Speciality fillers for paper, coatings and polymer formulations.

Grade-selection criteria

Criterion	Confirm in your RFQ
Particle morphology	Required limit, unit and test method
Particle size	Required limit, unit and test method
Brightness	Required limit, unit and test method
Surface treatment	Required limit, unit and test method

Request a quotation or sample

Send your application, specification, order quantity, monthly demand, packaging, delivery location and required date. Pricing, minimum order and lead time are confirmed in the quotation.

Quality review: request the current supplier TDS and SDS, applicable batch evidence and an application trial where needed. This guide is a sourcing profile; grade values are agreed with the quotation.

General material reference: Sibelco: industrial mineral families.
